

Site Expansion at Kelkay

East Yorkshire based garden landscaping manufacturer and supplier, Kelkay has just increased the size of its production and distribution site with the purchase of some adjoining land.

In a continuation of its on-going investment programme to improve site infrastructure, the company has bought a further 12 acres of land increasing the overall size of its site to 30 acres. The new purchase has been made for the express purpose of holding substantial stocks of Gardenstone.

Antony Harker, Managing Director, commenting on this latest investment said:

“Gardenstone’s demand is proving successful with new and existing stockists alike. To meet the anticipated demand for 2011 and ensure continuous supply throughout the season, we needed to expand our storage area. This additional 12 acres means we can now hold in excess of 16,000 packs at any one time.”
