

## Press Release

### **Bolsius Welcomes a Winter Wonderland**

The new 2010 winter range of candles from Bolsius is deliberately upbeat, strong on style and includes rich and metallic colours. Traditional festive reds mix with taupe, purple, gold, silver and black in finishes which range from ultra-glossy to rustic and frosted.

One of the highlights is Winter Scenery; five fragrance filled glasses decorated with photographic images from nature that epitomise autumn and winter. Chestnuts, winter crocus, pumpkins and hoar frosts adorn the opaque glass. Each design of Winter Scenery is available in outer cartons of 6 pieces.

The company's recent consumer research has shown that people like to change the look of their interiors regularly, often with the changing of the seasons. The new Bolsius winter range provides customers with the opportunity for classic tapers in traditional colours to sit alongside contemporary pillars in rich and striking colours, patterns and finishes. The latest Bolsius range is very much in keeping with the company's slogan "Colour your home".
